FRESE INTEGRALI PER IL CONTROLLO DELLE VIBRAZIONI, ALTE PRESTAZIONI

THIS CARBIDE CUTTING TOOLS LINE KEEPS VIBRATIONS UNDER CONTROL, HIGH PERFORMANCE GUARANTEED

DIESE VOLLHARTMETALL FRÄSER SERIE MINIMIERT VIBRATIONEN UND GARANTIERT HÖCHSTLEISTUNG

5104		5104F	
5104		5104F	
5104R		5104FR	

CARATTERISTICHE CHARACTERISTICS EIGENSCHAFTEN

Filo tagliente rinforzato con micro geometria, migliora la durata e la qualità superficiale.

Cutting edge preparation, increase tool life and improve the surface quality of work piece. ✓

Schneidkanten-Konditionierung, zur Standzeitverbesserung und für glatte Werkstückoberflächen.

Geometria variabile, diminuisce le vibrazioni.

Variable geometry, no vibrations and no chattering. ✓

Variable Schneidgeometrie, verhindert Vibrationen und Rattern.

Fori di lubrificazione sulla versione "F". Aumenta la durata e garantisce all'utensile una sempre corretta lubrificazione in tutti i punti durante la lavorazione. ✓

Coolant holes on "F" line. Being able to monitor the chip-flow, increase tool life.

Innere Kühlmittelzufuhr im TTE Design. Verbessert die Spanabfuhr und erhöht die Standzeit.

Vano truciolo con angoli irregolari. Diametro nocciolo robusto, conico.

Chip pocket Core diameter. Special profile to improve chip evacuation. ✓

Nutengeometrie, Kerndurchmesser. Optimiertes Profil zur besseren Spanabfuhr und besserer Stabilität der Fräser.

Frontale scaricato per utilizzo con elevati angoli di penetrazione.

Gash angle with micro geometry. Improve chip evacuation in ramp milling. ✓

Stirnschliff mit Mikrogeometrie. Optimale Spanabfuhr beim Eintauchen.

Run out tra gambo e taglienti < 4 μ, migliora la durata, consumo omogeneo dei taglienti.

Run out < 4 μ improve the surface quality of work piece and increase tool life. ✓

Rundlaufgenauigkeit unter 4 μ, verbessert die Oberflächengüte und verlängert die Standzeit.

APPROCCI E METODI DI LAVORAZIONE HOW TO APPROACH ANFAHRWEG

SI RACCOMANDA / IT IS RECOMMENDED / EMPFOHLEN

Nelle operazioni trocoidali, l'angolo di contatto deve essere $\alpha < 25^\circ$.

Angle engage in trochoidal operation must be less than 25° .

Der Umschlingungswinkel bei trochoidaler Bearbeitung darf 25° nicht überschreiten.

Nelle lavorazioni di acciai inossidabili e super leghe ridurre v_f uscita ed entrata del pezzo del 50%.

When milling stainless steel and super alloy reduce feed 50% in approach.

Beim Bearbeiten von rostfreien Stählen und Superlegierungen sollte der Vorschub um 50% reduziert werden.

Nella programmazione inserire raccordi xy.

Use smoothing milling.
Beim Schlichtfräsen in xy.

Nelle operazioni trocoidali prestare attenzione al percorso utensile. Evitare carichi variabili.

In trochoidal operation variable forces are not allowed. Must be used constant A_e value.

Bei trochoidaler Anwendung dürfen keine variablen Kräfte auftreten.

Durante le foratura il raggio fresa R deve essere $\leq \frac{1}{4}$ del diametro del foro realizzato.

When make a hole in helicoidal ramping milling, the diameter of hole must be $> 1,25 \times$ diameter of end mill.

Beim Lochfräsen über Spiralrampe muss der Lochdurchmesser mindestens $1,25 \times$ des Fräserdurchmessers betragen.

Quando si lavora titanio e super leghe, usare emulsione $\geq 10\%$.

While working titanium and duplex use % of oil $\geq 10\%$.

Beim Fräsen von Titan und Duplex-Materialien muss der Öl-Anteil im Kühlmittel mindestens 10% betragen.
