FRESA TORICA 4T - MINI BOOSTER

4 FLUTES CORNER RADIUS END MILL - MINI BOOSTER
4-NUTIGER ECKENRADIUS-FRÄSER - MINI BOOSTER

5826

FRESA TORICA 6T - MINI BOOSTER

6 FLUTES CORNER RADIUS END MILL - MINI BOOSTER
6-NUTIGER ECKENRADIUS-FRÄSER - MINI BOOSTER

CARATTERISTICHE CHARACTERISTICS EIGENSCHAFTEN

Filo tagliente rinforzato con micro geometria, migliora la durata e la qualità superficiale.

Cutting edge preparation, increase tool life and improve the surface quality of work piece. ✓

Schneidkanten-Konditionierung, zur Standzeitverbesserung und für glatte Werkstückoberflächen.

Geometria variabile, diminuisce le vibrazioni.

Variable geometry, no vibrations and no chattering. ✓

Variable Schneidgeometrie, verhindert Vibrationen und Rattern.

Vano truciolo con angoli irregolari. Diametro nocciolo robusto, conico.

Chip pocket Core diameter. Special profile to improve chip evacuation. ✓

Nutengeometrie, Kerndurchmesser. Optimiertes Profil zur besseren Spanabfuhr und besserer Stabilität der Fräser.

Run out tra gambo e taglienti < 4 μ, migliora la durata, consumo omogeneo dei taglienti.

Run out < 4 μ improve the surface quality of work piece and increase tool life. ✓

Rundlaufgenauigkeit unter 4 μ, verbessert die Oberflächengüte und verlängert die Standzeit.

APPROCCI E METODI HOW TO APPROACH ANFAHRWEG

SI RACCOMANDA / IT IS RECOMMENDED / EMPFOHLEN

Diminuire Ap se presente taglio interrotto su piani (fori, cave, ecc.).

Reduce Ap if interrupted cut is present on the surface (holes, slot, ect.).
Bei unterbrochenem Schnitt (Querbohrungen, Quernuten, etc.) Ap reduzieren.

1 Nella programmazione inserire raccordi xy.
Use smoothing milling.
Beim Schlichtfräsen in xy.

2

3 Lavorazione concorde.
Concorde up milling machining.
Gleichlaufräsen.

Diminuire Ap del 30% se si utilizza versione lunga.

Reduce Ap by 30%, if long version is used.
Bei Einsatz der langen Version des Werkzeuges Ap um 30% reduzieren.

4

5 Utilizzare rampa 2°.
Use ramp with 2 degrees.
Rampenwinkel von 2° verwenden.
